SIDE-BY-SIDE HOPPER SECTIONS.

P70-12020

**120# CAPACITY COMMERCIAL
BROADCAST SPREADER**

P70-12010

Powder-Coated Steel Frame

USED ON LANDSCAPING, SPORTS TURF, AND GOLF SURFACES.

The Spyker 36" commercial drop spreader is ideal for spreading seed, fertilizer, fine materials, lime and ice-melt. The two side-by-side hopper sections allow the operator to spread 18" or 36" wide, while ensuring even coverage and extremely accurate application rates for landscapes, golf courses and sports fields.

The spreader has both a metered bottom with 80 settings and bulk bottom AS STANDARD, which allows for fine material spreading and larger bulk materials. The 13" x 5" fully pneumatic turf tread tires distribute weight evenly for smooth operation, easy rolling and won't leave ruts.
