**SPREAD WIDTH UP TO 16'.
POWERFUL 12 VOLT DC MOTOR.**

120lb

S80-12020
120# ELECTRIC SPREADER

S80-12010
Stainless Steel Frame

USED ON LANDSCAPING, SPORTS TURF, AND GOLF SURFACES.

Featuring a powerful 12 volt DC motor protected by and mounted with corrosion-resistant stainless steel, the S80-12010 is equipped to both outperform and outlast season after season.

The motor is mounted outside of the large hopper to allow for more material, delivering a true 120 lb. capacity and helping you get the job done quicker with fewer refills. Spyker's electric spreader also comes standard with a Variable Speed Control—mounted conveniently within arm's reach—which controls the spread swath up to 16 feet.

The S80-12010's hopper gate control is operated by foot pedal when mounted on a ZTR mower. Otherwise, an optional 8 foot cable can be utilized for gate control on an ATV or UTV. The length of wiring from the variable speed controller to the motor is 160" (13.3 feet), and the length of wiring from the variable speed controller to the battery is 80" (6.7 feet).
